

Alphancestors

A Homestuck Fanzine dedicated to the Beforan Ancestors

Hello!

So, this is my first Zine ever. I was worried about how things would turn out, but in the end, I absolutely LOVED the result! I am still new to these things, and not many people joined, so it turned out to be a very small project, but doing it was totally worth it. I want to thank every single one of you who contributed and shared this, because without you, this project wouldn't have been a thing. The theme of "Beforan Ancestors" is not very explored much by the fandom, and that's why I chose to work on it.

Still, for my first Zine, this turned out wonderfully, and I want to thank all of the contributors for helping me making this real. Now, enjoy it! <3
